THE CONFERENCE EXPERIENCE

TESTIMONIAL

I wanted to let you know the SC Supply Chain show was very beneficial last year. Out of all the shows I attend, this one beyond paid for itself. We have never had an ROI on a show like this one. We captured more business from this show than any others we attended last year. We look forward to another great show this year!

Best Regards,

SPONSORSHIP INVESTMENT BRIEF

SCSHSC Spring Conference

Direct access to 98% of South Carolina's healthcare providers in two days.

98%

of SC healthcare facilities represented

2 days

to cover an entire territory

6–8 hrs

hands-on clinical education

The opportunity:

The South Carolina Society of Healthcare Supply Chain (SCSHSC) Spring Conference at Hilton Myrtle Beach Resort, Myrtle Beach, puts your brand face-to-face with the supply chain directors, clinical leaders, and hospital executives who hold purchasing authority across the state at a fraction of the cost of a national convention.

Why It Pays Off

- **Decision-makers, not foot traffic.**

Meet supply chain directors, clinical leads, and hospital executives in person — bypass the gatekeepers and cut months off the sales cycle.

- **Hands-on clinical access.**

The Clinical Product Competency Showcase delivers six to eight hours of hands-on education for attendees, aligning supply chain with product performance.

- **Lower acquisition cost.**

Regional travel and exhibit fees run well below national events. Quality over quantity: an exclusive audience of regional decision-makers, delivering lasting connections — not one-time impressions.

- **The Reverse Expo edge.**

Providers from 98% of SC's healthcare facilities staff the booths and host you, turning two days into a full territory's worth of qualified conversations.

- **Implicit endorsement.**

The SCSHSC board actively encourages members to review and support participating sponsors' products and services — during and after the event.

- **Built-in thought leadership.**

Position your brand on the issues driving SC healthcare now: automation, equipment lifecycle, tariff impact, and supply chain resilience.
